FOR IMMEDIATE RELEASE

2W Technologies, INC Achieves Microsoft Silver Small and Midmarket Cloud Solutions Competency

Pewaukee, WI – May 26, 2016 – 2W Technologies, INC, a full service Epicor ERP and IT Consultant offering Project and Managed Services, IT Infrastructure Solutions (both hardware and software), as well as specific industry solutions, today announced that it has achieved Microsoft Silver Small and Midmarket Cloud Solutions Competency. Achieving this demonstrates 2W Tech’s commitment to meeting clients evolving needs in today’s cloud-centric computing environment.

To earn a Microsoft silver competency, partners must successfully demonstrate expertise through rigorous exams, culminating in Microsoft certifications. To ensure the highest quality of services, Microsoft requires multiple client references for successful implementation and overall client satisfaction. Achieving this status, places them among the top 5 percent of Microsoft partners worldwide in that technology.

According to Microsoft, Office 365 is “the fastest growing commercial product ever,” so focus was put on ensuring expert implementation skills were achieved by Silver Partners. The Small and Midmarket Cloud competency allows partners to engage with Microsoft support on a priority level, a service that directly improves a partner’s ability to resolve support issues faster and more effectively. Small and Midmarket Cloud Solution competencies ensure existing and potential clients can engage with 2W Tech trusting the company demonstrated a Microsoft vetted level of expertise in this area. This competency furthers 2W Tech’s expertise in selling and deploying Microsoft Office 365 cloud and hybrid solutions to small and midmarket businesses.

About 2W Technologies, INC

For nearly 30 years, 2W Technologies has helped thousands of clients across North America maximize their ERP and IT Services investments. They have offices located in Milwaukee, Chicago, Ohio, Indiana, and Eastern Pennsylvania, but have Consultants expanding their footprint even further than those areas across the US. Outside of being a Gold Epicor ERP and Microsoft Gold partner, they also specialize in Managed Services, various types of Infrastructure, cloud and cyber security solutions.
