FOR IMMEDIATE RELEASE

2W Technologies, INC Announces Acquisition of Information Technology division of Janssen + Company

Pewaukee, WI – January 11, 2016 – 2W Technologies, INC today announced that it has entered into a definitive agreement to acquire Janssen + Company’s Information Technology properties. The combination of technology and expertise from the two companies will serve as the foundation for 2W Tech to further expand their footprint in Wisconsin. 2W Tech has been servicing the Wisconsin area for over 20 years and provides IT Infrastructure, Managed Services, and Epicor ERP solutions.

CEO and President of 2W Technologies, Mark Jamieson, has been making several moves to expand the business over the last year. “When you have the right people and your organization is structured properly, you can bring tremendous value for new clients. I think the former Janssen clients will be impressed with the 2W Tech support structure. I am excited for this next chapter in our organization and for the diversity that Janssen’s IT group can offer our portfolio.”

Along with the addition of the new clients, 2W Technologies, INC will add the experience and expertise of Janssen’s most senior IT Consultants.

2W Tech will begin transitioning the clients over immediately and are working to make this process seamless for all involved. This transition will allow Janssen + Company to focus on divesting the remainder of its business units after the sale of the audit, accounting and tax practice to Sikich LLP in September 2015.

About 2W Technologies, INC

For over 25 years, 2W Technologies has helped hundreds of clients across North America maximize their Epicor and other IT investments. They have offices located in Milwaukee, Chicago, Erie, and Meadville, but have Consultants expanding their footprint even further than those areas in the Midwest and Northeast part of the US. Outside of being a Certified Epicor ERP and Microsoft partner, they also specialize in Managed Services and various types of Infrastructure solutions.
