

EPICOR IN AZURE

ALL THE CONTROL, NONE OF THE SAAS

Epicor in Azure offers you on-premises control with the anytime, anywhere flexibility you expect from a SaaS implementation. All without the high infrastructure and hardware costs. Other benefits of deploying *Epicor in Azure* include:

- Greater agility
- Faster innovation
- Flexibility
- Completely secure
- Consumption-based pricing
- Built in your tenant as part of your network
- High performance
- High availability
- Redundant
- Anywhere, anytime access

EPICOR
Platinum Partner

Gold
Microsoft Partner

**TECHNOLOGY IS HARD
2W TECH IS EASY**

**Epicor
Certified Partner
MANAGED HOSTING**

Deploy your on-premises Epicor ERP on Microsoft Azure to drive faster growth and innovation as you move to digitally transform your business.

Approved by both Epicor and Microsoft, placing your ERP in Azure opens a range of flexibility, cost savings, and risk mitigation.

Flexible enough to serve the needs for small, mid-size, and large multi-national manufacturing. 2W Tech's *Epicor in Azure* is built in your Microsoft tenant and is part of your network.

The combined force of 2W Tech and Microsoft Azure accelerates your Epicor solution and gives you the scale, reliability, and performance of a Microsoft built product, coupled with the expertise of an Epicor Platinum Partner with over 30 years in business.
