PRESS RELEASE

2W Technologies, INC Recognized on CRN's 2026 AI Innovators List

Pewaukee, Wisconsin — November 3, 2026 — 2W Technologies, Inc. announced today that CRN, a brand of The Channel Company, has named 2W Tech to its inaugural AI Innovators list for 2026. CRN's AI Innovators list celebrates North American solution providers at the forefront of the AI revolution. The companies featured on this list have recognized the vast opportunities of AI and have integrated AI technologies into innovative solutions for their customers.

2W Tech helps manufacturers and distributors move AI from an interesting idea to a measurable business result. The company starts with business goals, guiding clients through discovery sessions, readiness assessments, and use case roadmaps, then builds the data foundation and governance that responsible AI requires. From there, 2W Tech puts AI to work through Microsoft Copilot, AI agents that automate repetitive work across departments, and Microsoft Fabric and Power BI analytics. At the center of this work is ResolveIQ™, 2W Tech's proprietary AI platform, which unifies systems, knowledge, workflows, and business data, including Epicor ERP data, into a sole source of context so AI answers are grounded in the information that actually runs the business.

This recognition adds to 2W Tech's growing collection of CRN honors. In 2026 alone, the company made its first appearance on the Solution Provider 500 list, earned its seventh consecutive spot on the MSP 500 list, and was named to the Tech Elite 250 list for the second year in a row.

"Being named to CRN's very first AI Innovators list tells us we are on the right path. Manufacturers and distributors do not need more AI hype. They need AI that understands their shop floor, their ERP, and their customers, and that is exactly what our team builds every day. We are proud of this recognition, and even prouder of the results our clients are achieving as they turn their data into faster decisions and more productive teams," said Mark Jamieson, President and CEO of 2W Technologies.

"Our 2026 AI Innovators honorees are helping shape the next generation of business transformation through the imaginative use of artificial intelligence," said Jennifer Follett, Vice President, U.S. Content and Executive Editor at CRN, The Channel Company. "By delivering forward-thinking solutions that create value for their customers and technology partners alike, they are pushing the industry forward and setting a high standard for innovation. We are honored to recognize their contributions."

Coverage of the 2026 AI Innovators list is available at AI Innovators 2026.
